

I claim:

1. A scooter bike comprising:

a front and rear bicycle wheel attached to a frame with handle bars and a bicycle seat, the rear bicycle wheel being larger in diameter than the front bicycle wheel;

a solid scooter floor attached to said frame between said two bicycle wheels, said scooter floor being in proximity to the ground, said scooter floor being sloped with its front lower than its rear, whereby said scooter floor allows propulsion by foot power.

2. The scooter bike of claim 1 wherein said front wheel is around 2 inches smaller than said rear wheel.

3. The scooter bike of claim 1 wherein said seat is around 16 inches from said handle bars.

4. The scooter bike of claim 1 wherein said scooter floor slants downward in front by around 10 degrees.

5. The scooter bike of claim 1 wherein said scooter floor is

around 6 inches above the ground at its rear and around 5.5 inches above the ground at its front.

6. The scooter bike of claim 1 wherein said front wheel is around 24 inches in diameter and said rear wheel is around 26 inches in diameter.

7. The scooter bike of claim 1 wherein said frame is aluminum.

8. A scooter bike comprising:

a front and rear bicycle wheel attached to a frame with handle bars and a bicycle seat, the rear bicycle wheel being larger in diameter than the front bicycle wheel;

a solid scooter floor attached to said frame between said two bicycle wheels, said scooter floor being in proximity to the ground, said scooter floor being sloped with its front lower than its rear, whereby said scooter floor allows propulsion by foot power;

said front wheel being around 2 inches smaller than said rear wheel and said scooter floor sloping downward around 10 degrees in front.

9. The scooter bike of claim 8 wherein said seat is around 16 inches from said handle bars.

10. The scooter bike of claim 8 wherein said scooter floor is around 6 inches above the ground at its rear and around 5.5 inches above the ground at its front.

11. The scooter bike of claim 8 wherein said front wheel is around 24 inches in diameter and said rear wheel is around 26 inches in diameter.

12. The scooter bike of claim 8 wherein said frame is aluminum.
